User Manual

WANG Zhenghe 17212010075

Dependency

- Linux

- Java

- Python3

- Flask

Quick Start

- Use "make" to compile the code.

- Use "make test" to test the code using file "test.in".

- Use "make web" to launch the Web Server listening on port 55555.

- Use your Web Browser to access "server ip:55555".

- That's all.

Notice

The Bootstrap is referenced from my PC in lab (10.131.255.74), but the network

access may be failed because our lab network is under repair.

If you have any other questions or just want to see the running project, check out

my video "Huffman.mp4".
